WHO WE ARE ?

At the forefront of innovation in network technology, we are a rapidly growing technology company dedicated to manufacturing professional network connectivity equipment tailored for international markets. With years of extensive experience and relentless research and development focused on Carrier Ethernet and Industrial Ethernet devices specifically designed for Telecom and IoT applications, our team has cultivated an expansive portfolio that addresses the intricate demands of sectors like Industrial 4.0, Smart City and Data Center.

17 YEARS OF ETHERNET CONNECTIVITY

LONG TERM COMMITMENT

Our goal is to provide top-notch value and ensure our customers and partners worldwide succeed with our ethernet solutions. We're all about deep collaboration to make that happen.

RELIABILITY EXCELLENCE

At Fiberroad, we take security seriously. Our team runs constant safety checks on all our products to identify and squash any potential vulnerabilities.

COST EFFICIENCY

Even if you're using Fiberroad devices in an industrial or commercial setting, the interfaces and controls are intuitive enough for just about anyone to pick up and use right away.

WHAT WE OFFER ?

Our product line was created to give our partners a chance to get in on the booming Industrial IoT and edge network connection markets. It includes Ethernet Access devices, Switching and Routing gear, and Optical Transport solutions.

Ethernet Access

- Industrial Wireless
- Fiber Media Converter
- Protocol Converter

Switching & Routing

- Layer 2 & 3 Industrial Ethernet
- Ethernet Embedded Modules
- PTP 1588 & TSN

Optical Transport

- 100G/400G Optical Transmission
- Optical Line System

Network Management

- WebGUI Management
- PREVIEW NMS
- FIRO Cloud Management

STRICT QUALITY ASSURANCE

Are you looking for top-quality telecommunication products? Then Fiberroad is the perfect brand that offers high-end solutions to meet your needs. But how does Fiberroad ensure its products are of superior quality and reliability? The answer lies in their rigorous Quality Assurance process, which involves stringent testing at every stage of development. In this blog post, we will take a closer look at the importance of strict testing in Fiberroad's Quality Assurance Process and how it benefits customers who choose their telecommunication products. So buckle up and get ready to learn more about what sets Fiberroad apart from other brands!

DC5-12V Power Input

What Is the DIP Switch on Unmanaged Media Converter?

DIP switch stands for dual in-line package switch. It is a simple and cost-effective component that can help select and change between various hardware or device options. Users just need to toggle each switch between on and off positions to enable and disable certain functions.

FR-POE232

- 1x10/100/1000M RJ45

Management Module

Multi-service platform chassis, which provides a reliable solution of high density media converter modules for applications such as telecom operator, enterprise, long haul transmission and factory automation.

The management Module connects to the chassis and communicates with the individual cards in the Managed Chassis. Only management traffic - no end-user data traffic - is sent across the managed Chassis to maintain security.

Each slide-in-module for managed Chassis has specific features and functions that are controlled via the Management Module. A network administrator can configure, monitor and troubleshoot slide-in-modules remotely via the management module. The remote management helps reduce operating expenses (OpEx) by reducing technician dispatches. Remote management allows for faster mean-time-to-repair by proactively receiving traps and alerts on potential issues. With less downtime you are able to focus on revenue generating aspects of your business.

Features

- Complete system information can be set up and displayed, including the name of the chassis, terrain information, related information of IP, constant operating time and the versions of the hardware and software
- Real time display of voltage and temperature on the cards of the media converters, temperature of chassis and report fault in time
- Supporting SFP/XFP, CWDM SFP/XFP and DWDM SFP/XFP, and it can show the SFP/XFP information and digital diagnosis function
- Remote power off alarming, precisely distinguish remote failure
- Equipment restart, system or module restart by management software, set-up information on each module will be stored spontaneously when power off
- Reset to factory set up or dip switch status are optional
- Each port at local or remote devices can be set up or tracked, including the connecting status, connecting speed, half/full duplex, port locked and LFP etc.
- Supporting Loopback and PRBS, precisely locating the failure, convenient for link test

AUTO PRO SERIES

UNMANAGED INDUSTRIAL SWITCHES

Auto Broadcast Suppression

The switch independently learns the addresses of termination devices connected to a port by evaluating the source addresses in the data.

Auto PROFINET PTCP Filtering

Auto PROFINET PTCP Filtering blocks PROFINET PTCP-Delay traffic. Because PTCP-Delay uses the same MAC address (01-80-C2-00-00-0E), the filter blocks LLDP traffic as well.

Auto QoS Priority

Auto QoS, when heavy traffic occurs, packets with an 802.1Q priority level of 4 to 7 or with an IPv4 Type of Service Precedence value of one or more are considered high priority.

FICE205

Port

5x10/100M RJ45

Power Supply

6-pin Phoenix Contact, 2x9-72VDC

LAYER 2 PLUS MANAGED INDUSTRIAL ETHERNET SWITCH

Management and Maintenance

- Console, Telnet, SSH 2.0
- HTTP/HTTPS
- SNMP v1/v2/v3
- Upload and download files vis TFTP/FTP
- SNMP

L2 Features

- 802.1d (STP), 802.1d (RSTP), 802.1s (MSTP)
- ERPS(G.8032v2)
- Loopback Detection
- Link Aggregation

VLAN

- 4K VLAN Entries
- QinQ/Selective QinQ
- GVRP

PoE Management

- PoE Scheduling
- Ping Watchdog with Reboot
- Enable/Disable, Priority Level, Power Level

Security Features

- Suppression of broadcast, multicast and unknown unicast packet
- Port isolation
- IP Source Guard
- Port security, MAC+port binding
- DHCP snooping, DHCP option82
- DHCP Client IPv4/IPv6
- Port-based IEEE 802.1x authentication

MAC Table

- Static MAC Entries
- Configurable aging time of MAC address
- Independent learning mode per Port

Multicast Features

- Dynamic/Static Multicast groups
- IGMP Snooping v1,2,3
- Port-based IGMP Snooping Fast Leave
- GMP Querier

Monitoring Functions

- Interface Statistics
- CPU/RAM Utilization Monitoring
- Temperature Monitoring
- Port Cable Test/Ping Test
- Port Mirroring

QoS

- 802.1P/DSCP Class of Service
- Scheduling algorithms such as SP, WRR or WFQ
- Ingress/Egress Rate Limitation

ACL

- L2/L3/L4 ACL
- ACL Based on:
 1. IP Protocol ICMP/IGMP/TCP/UDP
 2. Source/Destination MAC
 3. VLAN
 4. Ethernet Type

Layer 3 Features

- Static Routing

Layer 2 Plus Managed Industrial Ethernet Switch

EMBEDDED ETHERNET SWITCH MODULE SERIES

Fiberroad Embedded Ethernet Switch Module Series is designed for device manufacturers who would like to embed Ethernet modules in their products to enhance performance and reliability. The Embedded Ethernet Switch Module Series provides an easy and cost-effective integrated solution for adding an Ethernet switch module to an existing product.

**Rapid
Secondary
Development**

**Flexible
Interface
Specifications**

**Low
Power
Consumption**

**Customized
On
Demand**

FR-FISE6218G

Built-in MIPS processor, maximum frequency 500MHz, dual 16K L2 cache design, built-in 128K SRAM.

Industrial-grade design, supports 4M Buffer Size, 8K MAC addresses.

Supports flexible secondary development of Ethernet ports, up to 10 Gigabit Optical Fiber Port+ 8 10/100/1000M RJ45 port.

Built-in management and logging functions, supporting Layer 2 + management protocols.

Supports Lite-layer 3 functions and protocols such as static routing.

The power consumption of the whole machine at full load is $\leq 3W@3.3VDC$.

FR-FISE6300

1M Buffer Size and 8K MAC addresses.

Supports 3 Gigabit ports + 7 Fast Ethernet expansion ports.

Built-in 2-channel RS485+1-channel CAN interface.

Built-in management and logging functions, supporting RSTP/ERPS ring network.

The whole machine meets the application requirements of industrial site environment.

The power consumption of the whole machine at full load is $\leq 3W@3.3VDC$.

FR-FISE6228G

Built-in MIPS processor, maximum frequency 500MHz, dual 16K L2 cache design, built-in 128K SRAM.

Industrial-grade design, supports 4M Buffer Size, 8K MAC addresses.

Supports flexible secondary development of Ethernet ports, up to 20 Gigabit Optical Fiber Port+ 8 10/100/1000M RJ45 port.

Built-in management and logging functions, supporting Layer 2 + management protocols.

Supports Lite-layer 3 functions and protocols such as static routing.

The power consumption of the whole machine at full load is $\leq 3W@3.3VDC$.

INTRINSIC SAFETY

INDUSTRIAL ETHERNET CONNECTIVITY

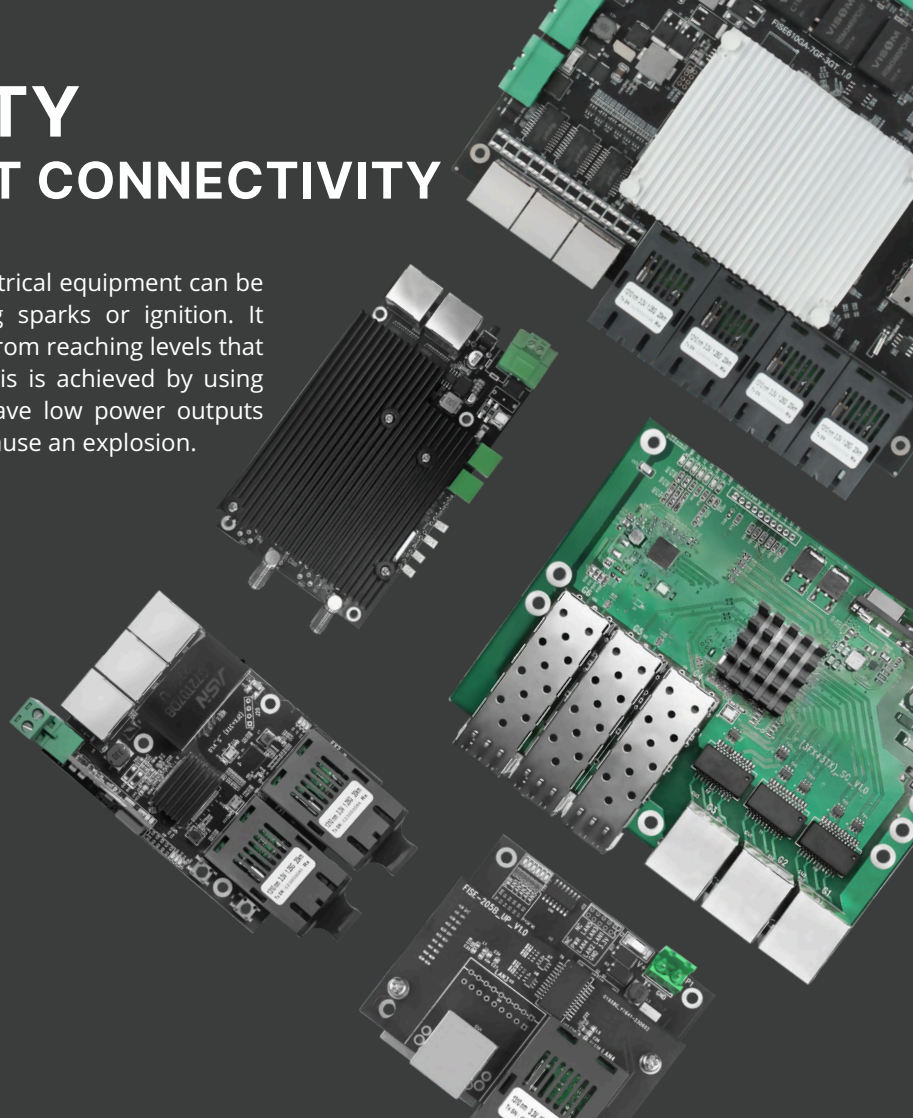

Intrinsic safety is a design concept that ensures electrical equipment can be used in hazardous environments without causing sparks or ignition. It involves limiting electrical energy and preventing it from reaching levels that could ignite flammable gases, vapors, or dusts. This is achieved by using specially designed intrinsically safe devices that have low power outputs and are incapable of generating enough energy to cause an explosion.

Full load power consumption $\leq 10W$,
It has a power supply that meets
safety standards, with protection
against overvoltage, undervoltage, and
reverse polarity.

The whole machine is built to
withstand harsh industrial conditions.
It can operate in a wide temperature
and pressure range, plus it's moisture-
proof, mildew-proof, insulated, and
pressure-resistant.

LAYER 3 MANAGED INDUSTRIAL ETHERNET SWITCH

Management and Maintenance

- Console, Telnet, SSH 2.0
- HTTP/HTTPS
- SNMP v1/v2/v3
- Upload and download files via TFTP/FTP
- SNT/TELNET/SSHv1/v2
- ICMPv6/ICMPv4 Remote Ping
- LLDP/LLDP-MED/UDLD

L2 Features

- 802.1d (STP), 802.1d (RSTP), 802.1s (MSTP)
- BPDU Guard, BPDU filtering
- ERPS(G.8032v2)
 - Loopback Detection
 - Link Aggregation/LACP/Stack Trunk/Traffic Load Balancing

VLAN

- IEEE 802.1Q tag-based VLAN
- 4K VLAN Entries
- QinQ/Selective QinQ
- MAC-based VLAN
- GVRP
- Voice / Surveillance VLAN
- MVR (Multicast VLAN Registration)

Security Features

- Suppression of broadcast, multicast and unknown unicast packet
- Static MAC address
- IP Source Guard
- DoS attacks prevention
- Dynamic ARP Inspection
- DHCP snooping, DHCP option43/82
- DHCP Client IPv4/IPv6
- Port-based IEEE 802.1x authentication
- MAC-based/Local/RADIUS authentication
- AAA(RADIUS/TACACS+)

MAC Table

- Static MAC Entries
- Configurable aging time of MAC address
- Independent learning mode per Port

Routing Protocols

- RIPv1/v2
- OSPFv1/v2
- IPv4/IPv6 Static Route

IPv6 Application

- HTTP/HTTps
- SSH/SNMP
- TFTP/Syslog/Ping
- DHCP/ACL

Monitoring Functions

- Interface Statistics
- CPU/RAM Utilization Monitoring
- Temperature Monitoring
- Port Cable Test/Ping Test
- Port Mirroring
- RMON

QoS

- 802.1P/DSCP Class of Service
- Scheduling algorithms such as SP, WRR, WFQ or Hybrid(WRR+SP or WFQ+SP)
- Ingress/Egress Rate Limitation

Multicast Features

- Dynamic/Static Multicast groups
- IGMP Snooping v1,2,3
- IGMP Snooping Fast Leave
- GMP Querier
- MLD Snooping v1/v2

ACL

- L2/L3/L4 ACL
- ACL Based on:
 1. Source/Destination MAC
 2. VLAN
 3. COS
 4. Ethernet Type

Layer 3 Managed Industrial Ethernet Switch

LAYER 3 PRO MANAGED INDUSTRIAL ETHERNET SWITCH

Management and Maintenance

- Console, Telnet, SSH 2.0
- HTTP/HTTPS
- SNMP v1/v2/v3
- Upload and download files vis TFTP/FTP
- NTP/TELNET/SSHv1/v2
- ICMPv6/ICMPv4 Remote Ping
- LLDP/LLDP-MED/UDLD/sFlow

Redundancy Features

- 802.1d (STP), 802.1d (RSTP), 802.1s (MSTP)
- BPDU Guard, BPDU filtering
- ERPS(G.8032v2)
 - Loopback Protection
 - IEEE 802.3ad LACP/static trunk
 - MRP(Media Redundancy Protocol)
 - APS Protocol

VLAN

- IEEE 802.1Q tag-based VLAN
- 4K VLAN Entries
- QinQ/Selective QinQ
- MAC/Protocol/IP Subnet-based VLAN
- MVRP/GVRP/Private VLANs
- Voice / Surveillance VLAN

OAM

- IEEE 802.3ah Ethernet OAM
- Dying Gasp
- IEEE 802.1ag CFM
- IEEE 802.3ah UDLD

Security Features

- Static MAC address
- IPv4/v6 IP Source Guard
- Dynamic ARP Inspection
- Guest VLAN
- DHCP snooping, DHCP option43/82
- DHCP Client IPv4/IPv6
- Port-based IEEE 802.1x authentication
- MAC-based/Local/RADIUS authentication
- AAA(RADIUS/TACACS+)

MAC Table

- Static MAC Entries
- Configurable aging time of MAC address
- Independent learning mode per Port

Time Synchronization

- IEEE 1588v2 PTP
- 802.1AS-Rev
- 802.1Qbv
- 802.1Qci
- 802.1CB
- 802.1Qbu

ACL

- L2/L3/L4 ACL
- ACL Based on:
 1. Source/Destination MAC
 2. VLAN
 3. DSCP
 4. Ethernet Type

Monitoring Functions

- Interface Statistics
- CPU/RAM Utilization Monitoring
- Temperature Monitoring
- Port Cable Test/Ping Test
- Port Mirroring
- RMON
- UPnP(Universal Plug and Play)

QoS

- Shaping, Policing
- IEEE 802.1p Class of Service (CoS)
- Storm Control
- Bandwidth management
- Scheduling:SP/WRR
- ACL-based traffic classification
- ACL-based CoS/DSCP assignment
- DSCP to CoS remarking
- CoS to DSCP remarking
- ACL-based VLAN assignment

Multicast Features

- Dynamic/Static Multicast groups
- IGMP Snooping v1,2,3
- Port-based IGMP Fast Leave
- GMP Querier
- MLD Snooping v1/v2

Routing Protocols

- RIPv1/v2
- OSPFv1/v2/v3
- IPv4/IPv6 Static Route

Management Features

- Support SNMP、CLI、WEB、TELNET Network Management method .
- Completely visual graphic information .
- Entire network topology auto-discovery, Automatically generate network elements.
- Electronic map positioning, Fault location quickly and accurately.
- Voice alarm, e-mail alerts, SMS alerts, real-time online remote monitoring.
- EMS Management Platform, Covering entire Process from Plan to maintenance .
- Fault quick diagnosis, One-click export resource statements.
- Cable Fault point localization diagnosis, real-time detection cable quality .
- OPM channel scanning, OSNR real-time monitoring.

FR8000-NMS

Interfaces

1xRS-232
4x10/100Base-TX
2x100Base-X SFP
1xE1

Management Access

SNMP
WebGUI
Telnet
CLI

Management Features

Fault Management
Performance Management
Security Management
Configuration Management
Event Management
Log Management
Alarm Management
Topology Management
User Management
Online Firmware Upgrade

Platform

FR8000-CH08
FR8000-CH16

Environment

-10 to 60°C Operating Temperature
5% to 95°C Non-condensing

Power Consumption

≤15W

FR8000-OTURQS2S

Interfaces

Client Side: 4x10G SFP+ Slots
Line Side:4x10G SFP+ Slots

Data Rate

Fiber Channel: 8.5/10G
SONET OC-192, STM-64
10G WAN (10Gbps)
10G LAN(10.31Gbps)

Wavelength

850nm, 1310nm, 1550nm
CWDM, DWDM

FR8000-OCIDX2XX

Interfaces

Client Side:2x10G XFP Slots
Line Side:4x10G XFP Slots

Data Rate

Fiber Channel: 8.5/10G
SONET OC-192, STM-64
10G WAN (10Gbps)
10G LAN(10.31Gbps)

Protection

1+1 Line Side Protection

FR8000-TMX

Interfaces

Client Side: 8x1.25G SFP Slots
Line Side: 2x10G SFP+ Slots

Management Features

Client Side Rate Limitation
Client and Line side Loopback

Protection

1+1 Line Side Protection

FR8000-OTURDX2X

Interfaces

Client Side: 2x100G QSFP28 Slots
Line Side: 2x100G QSFP28 Slots

Management Features

Port working Status
Digital Optical Monitoring

Wavelength

Client Side LR4
Line Side: LR4/ZR4/PAM4

FR8000-OD/OM

Number of Channels

40/48

Channel Spacing

100 GHz

Central Wavelength

C-band

Insertion Loss

$\leq 4.5\text{dB}$ (Typical)

FR8000-BA/PA/LA

Mode

BA: Booster Amplifier
LA: In-line Amplifier
PA: Pre Amplifier

Operating Wavelength

1528-1565nm

Embedded OSC for remote management and topology detection

Integrated single/dual DCM for long distance 10G amplified links

GLOBAL DISTRIBUTOR RECRUITING

Looking forward to our Partnership

Through our years of experience, we have focused on creating a recipe for promptly addressing the evolving demands of the market. Our philosophy does not involve sacrificing efficiency, dependability, and user-friendliness in our devices - these aspects are ingrained in our products as a reflection of our vision and principles.

Currently, we have distribution points in various countries worldwide, including the United Kingdom, France, Spain, Italy, Malaysia, Indonesia, Uzbekistan, Egypt, Saudi Arabia and more.

We are constantly expanding and aspire to compete in the international market.
